EvergreenHealth is an integrated two-hospital healthcare system offering a breadth of services and programs that is among the most comprehensive in the region. Formed in 1972 as a public hospital district, we now serve nearly 850,000 residents of our service area in north King and south Snohomish counties, with medical facilities located throughout the area for easy access.

Our goal is to improve the health of every life we touch by delivering the highest quality care and absolute patient safety, and we're honored to be rated among the top 5% of hospitals in the nation for clinical excellence by Healthgrades. We take great pride in offering the latest medical technology, but our care is set apart by the personal touch provided by our staff of nearly 3,000, our 950 physician partners and our 1,100 volunteers.

Our main campus is located in Kirkland, and includes a 318-bed medical center and four medical specialty buildings.

Our EvergreenHealth Medical Group, a 200 member physician multispecialty group, provides nine primary care clinics, two urgent cares and 25 specialty care practices located throughout our service area.

All told, we offer care in 70 clinical specialties, from primary care to specialty care, from the family maternity center to senior care and hospice care. To further bolster our capabilities and extend access to services, EvergreenHealth has partnered with two other regional healthcare leaders, Virginia Mason and Seattle Cancer Care Alliance. We also serve the

community with our 24/7 Nurse Navigator and Healthline and hundreds of community health education classes and presentations each year.

Swedish Cherry Hill Campus

Office information

500 17th Ave.
Seattle, WA 98122

Thanks to the dedicated support of many people, a new master plan for the Swedish Cherry Hill campus was approved by the Seattle City Council on May 16, 2016. Our new master plan will allow Swedish to continue providing family medicine and emergency services to patients of all ages, while also treating and curing the most complex cardiovascular and neurological diseases. You can learn more about our master plan here.

The Swedish Cherry Hill campus is located in Seattle's historic Central District. The building now known as James Tower was home to the first hospital in Seattle, established in 1877 by the Sisters of Providence, a Catholic charity. In July 2000, Providence Seattle Medical Center, as it was then known, became part of Swedish.

Since then, the campus has undergone more than $100 million in new construction and renovations and now stands as one of the most modern and technologically advanced

medical facilities in our region. Renovations include new neurosurgery and cardiovascular surgery operating rooms and interventional suites that are among the most advanced in the country.
